

1. "standards" is such a vague word that there is not way to know what you mean.

2. Making it illegal/impossible to record a broadcast signal from TV takes away our basic rights as cosumers to pay for a product and then use that product, for now gain to ourselves, as we please. I will no longer be able to record a football game while I am at church, be able to record the latest Discovery channel story while I am at my daughters dance recital or any million of other things I can no longer do.
